WHY BUY FROM US

Bike Plug-and-Play with Aftermarket Amplifiers!

front speaker pod plugs.

Speakers."

distortion.

with this plug.

harness loops the speaker signal from the radio back out to the speaker locations, bypassing the amplifier entirely.

• Front radio outputs are routed directly to the

Saddlebag lid speakers are available via a

pigtail on this harness labeled "Rear

Get Rid of That Factory Amp! Make Your

Until now, removing a factory amplifier required lots

of rewiring. Removing the factory amplifier

disconnects the speakers from the radio. This

and plug this harness in, and you are done.

A front plug & play signal adapter is required when using this harness.

This harness works hand in hand with our standard

2014-Up Harley Plug & Play Adapter for Aftermarket

Easy installation. Unplug the factory amplifier

Amplifiers. The front plug and play signal adapter will give you RCA outputs to connect to your aftermarket amplifier or sound processor while also presenting a resistive load to your factory radio. The

resistive load increases sound quality and allow you

to use the entire volume range of the radio without

You can find the front plug & play signal harness here.

Installation Notes:

(Bikes with Factory Harley Amplifier in Saddlebag)

1. On some amplified bikes with a second factory amplifier located in the left saddlebag, the rear speaker signal might not be available in this plug.

models. The saddlebag amplifier bypass harness will connect the signal circuits coming from the front of the bike (either at the radio or the front amplifier bypass harness) to the lid speakers, Eliminating the need for new aftermarket speaker lines and saddlebag disconnects to be run from the front of the bike back to the bags. Keep your factory saddlebag connections!

## 2. Our saddlebag amplifier bypass harness is also required to bypass the rear amplifier on these models. The saddlebag amplifier bypass harness

On those models, the rear speaker signal for the

harness and will require splicing for the rear

saddlebag lids will need to be grabbed at the radio

speakers. The front speakers, though, will still work
