- ³ Application of Denim Clear 98628CLR recommended
- ⁴ DO NOT USE CLEAR COAT FOR THIS COLOR
- ⁵ NOTE REGARDING SEDONA ORANGE P/N 98628DGX:
It is recommended the base coat be catalyzed and dried for at least 24 hours before applying the clear coat, otherwise uneven color distribution may result

Unless otherwise specified, all colors require the following 4-step process:

1. PRIME COAT - Even if parts have been primed from H-D it is still necessary to apply Primer 98628G (quart) or 98606A (aerosol) prior to applying base/top coats. This is required to maintain accurate matching of final color.
2. BASE COAT (if required)
3. TOP COAT
4. CLEAR COAT 98628EK (quart) or 98606EK (aerosol)
